

Canvas Framing

Assembly, Clipping & Order Packaging Procedure

This document outlines the full canvas framing workflow at Keith Merrick, from matching the canvas to its order through clipping, bagging, and staging for pickup. Follow all steps in sequence for each order.

- Materials needed per canvas: poster frame, 4 screws, 4 metal canvas clips, 1 note card, bag. Order forms and note cards are located near the stretching station.

1. Order Matching & Frame Setup

Before assembling, confirm the canvas and frame match the order exactly. Mismatches at this stage will cause errors downstream.

- 1 Match the latest canvas from the **stretching station** with its order form. Confirm the **order number** and **canvas wood type** (order numbers typically follow the format e.g. 902413).
- 2 Place the correct **poster frame face down**. Insert the canvas **vertically** with the **top facing away from you**.

- **Always verify the order number and wood type before placing the canvas in the frame. Do not proceed if there is any mismatch.**

2. Attaching Canvas Clips

Secure the canvas to the frame using metal clips and screws. Correct clip placement ensures a tight, professional fit.

- 3 Grab **4 screws** and **4 metal canvas clips**. Place them across from each other on the left and right sides in a **rectangle pattern**, approximately **3 inches from the top and bottom**. Orient each clip with the **short side on the canvas wood frame** and the **long side on the back of the canvas**.
- 4 Fasten screws into the **wood frame only**. Leave the canvas-side holes empty. Ensure a **tight fit**.

- **Do not screw into the canvas-side holes. Screws go into the wood frame only. Over-tightening may damage the frame.**

3. Adding the Note Card

A note card is placed on the face of every finished canvas before bagging.

- 5 Turn the canvas around. Take a **small note card** from the stack near the order forms.
- 6 Place the card on the **face of the canvas** — preferably at the bottom, sitting on the edge of the frame.

4. Bagging & Staging for Pickup

Once clipped and noted, bag the canvas and stage the complete order at the table behind the canvas stretching station.

- 7 **Bag the canvas.** Move it to the table behind the stretching station with the **order form and any smaller pictures placed on top.**
- 8 Bring the bagged canvas to the **table behind the canvas stretching station** and place the **order form on top of the canvas.**
- 9 Grab the **corresponding smaller pictures** and place them **on top of the bagged canvas.**

Quick Reference Checklist

#	Task	Location / Notes
1	Match canvas to order form; confirm order # & wood type	Stretching station
2	Frame face down; canvas vertical, top away from you	Work table
3	Place 4 clips in rectangle pattern, ~3" from top & bottom	Work table
4	Fasten screws into wood frame only; ensure tight fit	Work table
5	Turn canvas over; take note card from stack	Near order forms
6	Place note card on canvas face (bottom edge preferred)	Canvas face
7	Bag the canvas	Work table
8	Move to table behind stretching station; order form on top	Staging table
9	Place smaller pictures on top of bagged canvas	Staging table
